**TABLE 4-3**  
**ENVIRONMENTAL SIGNIFICANCE CHECKLIST**

This checklist was used to identify physical, biological, social, and economic factors which might be impacted by the proposed project. In some cases, environmental factors listed in the checklist will not be affected because of the nature of the project. In other cases, background studies performed in connection with the proposed project clearly indicate that the project will not affect a particular item. A "NO" answer in the first column documents these determinations. A "YES" answer in the first column indicates that a particular factor will be affected by the project and is followed by a response in the second column as to whether the effect is significant. All items on the checklist, including all "No" answers, require an explanation. Where the checklist refers to a resource that is not involved or associated with the project in any way, we have determined that there are no project-imposed effects. The discussion of potential effects and proposed mitigation measures can be found in the section following the checklist.

	<b>Yes or No</b>	<b>If Yes, is it <u>Significant</u></b>
<b>Physical.</b> Will the proposal (directly or indirectly):		
1. Appreciably change the topography or ground surface relief features? .....	No
